The Wharton School, University of Pennsylvania

Kendall Whitehouse, associate director of Publishing and Media Technologies, Wharton School.

Faculty and Students Have Easy Access to a World of Information Using Adobe Acrobat

What started out as a project to provide students and faculty with easy access to computer documentation has evolved into an extensive on-line information network, with formatted electronic documents published across the Internet worldwide computer network. It is called the Wharton Information Network, and Adobe Acrobat software is an integral part.

"Adobe Acrobat is a powerful tool for sharing information across the Wharton School campus or around the world via the Internet worldwide network," says Kendall Whitehouse, associate director of publishing and media technologies at Wharton. "Providing information on the network in a single format — Acrobat software's Portable Document Format (PDF) — has enabled us to expand the Wharton Information Network far beyond our initial expectations."

The Wharton School of the University of Pennsylvania is one of the leading and most innovative global business schools in the world. Every year, Wharton provides top-rated management education to nearly 5,000 undergraduate, **MBA** and doctoral students. In the process, students and faculty
